Advanced Linear Algebra (Textbooks in Mathematics)

Nicholas Loehr

Advanced Linear Algebra (Textbooks in Mathematics) Nicholas Loehr

Designed for advanced undergraduate and beginning graduate students in linear or abstract algebra, **Advanced Linear Algebra** covers theoretical aspects of the subject, along with examples, computations, and proofs. It explores a variety of advanced topics in linear algebra that highlight the rich interconnections of the subject to geometry, algebra, analysis, combinatorics, numerical computation, and many other areas of mathematics.

The book's 20 chapters are grouped into six main areas: algebraic structures, matrices, structured matrices, geometric aspects of linear algebra, modules, and multilinear algebra. The level of abstraction gradually increases as students proceed through the text, moving from matrices to vector spaces to modules.

Each chapter consists of a mathematical vignette devoted to the development of one specific topic. Some chapters look at introductory material from a sophisticated or abstract viewpoint while others provide elementary expositions of more theoretical concepts. Several chapters offer unusual perspectives or novel treatments of standard results. Unlike similar advanced mathematical texts, this one minimizes the dependence of each chapter on material found in previous chapters so that students may immediately turn to the relevant chapter without first wading through pages of earlier material to access the necessary algebraic background and theorems.

Chapter summaries contain a structured list of the principal definitions and results. End-of-chapter exercises aid students in digesting the material. Students are encouraged to use a computer algebra system to help solve computationally intensive exercises.

From reader reviews:

Frances Heath:

Book is actually written, printed, or descriptive for everything. You can learn everything you want by a publication. Book has a different type. To be sure that book is important issue to bring us around the world. Next to that you can your reading ability was fluently. A publication Advanced Linear Algebra (Textbooks in Mathematics) will make you to end up being smarter. You can feel a lot more confidence if you can know about every little thing. But some of you think this open or reading some sort of book make you bored. It's not make you fun. Why they could be thought like that? Have you in search of best book or suitable book with you?

Joyce Coolidge:

Book is to be different for each grade. Book for children until adult are different content. As you may know that book is very important for us. The book Advanced Linear Algebra (Textbooks in Mathematics) ended up being making you to know about other information and of course you can take more information. It is quite advantages for you. The e-book Advanced Linear Algebra (Textbooks in Mathematics) is not only giving you more new information but also for being your friend when you experience bored. You can spend your current spend time to read your e-book. Try to make relationship with all the book Advanced Linear Algebra (Textbooks in Mathematics). You never really feel lose out for everything if you read some books.

Frances Drury:

Do you really one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Aim to pick one book that you just dont know the inside because don't assess book by its cover may doesn't work is difficult job because you are scared that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer might be Advanced Linear Algebra (Textbooks in Mathematics) why because the great cover that make you consider in regards to the content will not disappoint you actually. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly direct you to pick up this book.

Lise Callicoat:

With this era which is the greater person or who has ability in doing something more are more valuable than other. Do you want to become one among it? It is just simple solution to have that. What you should do is just spending your time almost no but quite enough to enjoy a look at some books. One of many books in the top list in your reading list is Advanced Linear Algebra (Textbooks in Mathematics). This book which is qualified as The Hungry Slopes can get you closer in getting precious person. By looking upward and review this reserve you can get many advantages.
