Governance of Security and Ignored Insecurities in Contemporary Europe (Advances in Criminology)

Governance of Security and Ignored Insecurities in Contemporary Europe (Advances in Criminology)

This book explores changes in security governance in Europe from the 1990s, focusing on some of the most important consequences: the proliferation of ignored insecurities, including the increase of oncological diseases, environmental disasters, shadow economies reproducing neo-slavery and fiscal fraud, and the general damage to the res publica. What is the articulation of removal, reclamation and consequently the implementation of devices and the establishing of prevention practices? Why are the majority of victims and also the control agency professionals seemingly resigned to these ignored insecurities? Following more than 20 years of research in the area, the authors examine these questions and how the securitisation of society has been exacerbated. They argue that the primary cause of the increase in ignored insecurities is the consequence of the neoliberal turn in security governance. This book proposes an innovative approach to security governance, not only through a serious analysis of the balance of the costs and benefits, but also highlighting what is here termed 'ignored insecurities'. The authors propose a review of the problems, showing that the governance of security is a crucial element of the contemporary political organisation of society.
