**Heat Conduction** David W. Hahn, M. Necati Ozisik

**The long-awaited revision of the bestseller on heat conduction**

*Heat Conduction, Third Edition* is an update of the classic text on heat conduction, replacing some of the coverage of numerical methods with content on micro- and nanoscale heat transfer. With an emphasis on the mathematics and underlying physics, this new edition has considerable depth and analytical rigor, providing a systematic framework for each solution scheme with attention to boundary conditions and energy conservation. Chapter coverage includes:

- Heat conduction fundamentals
- Orthogonal functions, boundary value problems, and the Fourier Series
- The separation of variables in the rectangular coordinate system
- The separation of variables in the cylindrical coordinate system
- The separation of variables in the spherical coordinate system
- Solution of the heat equation for semi-infinite and infinite domains
- The use of Duhamel's theorem
- The use of Green's function for solution of heat conduction
- The use of the Laplace transform
- One-dimensional composite medium
- Moving heat source problems
- Phase-change problems
- Approximate analytic methods
- Integral-transform technique
- Heat conduction in anisotropic solids
- Introduction to microscale heat conduction

In addition, new capstone examples are included in this edition and extensive problems, cases, and examples have been thoroughly updated. A solutions manual is also available.

*Heat Conduction* is appropriate reading for students in mainstream courses of conduction heat transfer, students in mechanical engineering, and engineers in research and design functions throughout industry.

**From reader reviews:**

**Carl Strum:**

Have you spare time for any day? What do you do when you have much more or little spare time? Sure, you can choose the suitable activity with regard to spend your time. Any person spent their very own spare time to take a wander, shopping, or went to typically the Mall. How about open as well as read a book allowed Heat Conduction? Maybe it is to be best activity for you. You recognize beside you can spend your time with your favorite's book, you can more intelligent than before. Do you agree with it has the opinion or you have other opinion?

**Sarah Fernandez:**

Book is to be different per grade. Book for children until eventually adult are different content. As it is known to us that book is very important for all of us. The book Heat Conduction was making you to know about other understanding and of course you can take more information. It is rather advantages for you. The guide Heat Conduction is not only giving you considerably more new information but also being your friend when you truly feel bored. You can spend your spend time to read your reserve. Try to make relationship with all the book Heat Conduction. You never truly feel lose out for everything should you read some books.

**Marie Michael:**

This Heat Conduction are reliable for you who want to be described as a successful person, why. The explanation of this Heat Conduction can be on the list of great books you must have is giving you more than just simple reading food but feed a person with information that probably will shock your earlier knowledge. This book is handy, you can bring it all over the place and whenever your conditions at e-book and printed ones. Beside that this Heat Conduction giving you an enormous of experience such as rich vocabulary, giving you tryout of critical thinking that we know it useful in your day exercise. So , let's have it and luxuriate in reading.

**James Mace:**

Do you have something that you like such as book? The guide lovers usually prefer to choose book like comic, brief story and the biggest you are novel. Now, why not trying Heat Conduction that give your fun preference will be satisfied through reading this book. Reading practice all over the world can be said as the opportunity for people to know world a great deal better then how they react toward the world. It can't be mentioned constantly that reading behavior only for the geeky man but for all of you who wants to always be success person. So , for all of you who want to start studying as your good habit, you may pick Heat Conduction become your personal starter.
