Structure and Chemistry of Crystalline Solids

Bodie Douglas, Shi-Ming Ho

Structure and Chemistry of Crystalline Solids Bodie Douglas, Shi-Ming Ho

Crystallographers have an elegant system using definitive notation for describing crystal structures, but it does not serve as well the needs of many others working with crystalline solids. Most chemists, metallurgists, mineralogists, geologists and workers in material sciences need a simple system and notation for describing crystal structures. Structure and Chemistry of Crystalline Solids presents a widely applicable system with simple notation giving important information about the structure and the chemical environment of ions or molecules. It is easily understood and used by those concerned with applications dependent on structure-properties relationships. This book addresses the needs of people working with crystal structures in several fields, while most other books on crystal structures are more than two decades old. Early chapters provide an introduction to crystal structures and symmetry for readers with a variety of backgrounds.

From reader reviews:

Nathanael Ma:

Have you spare time to get a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the actual Mall. How about open or perhaps read a book eligible Structure and Chemistry of Crystalline Solids? Maybe it is being best activity for you. You already know beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with the opinion or you have different opinion?

Sharon Doyle:

Reading a publication tends to be new life style within this era globalization. With reading through you can get a lot of information that could give you benefit in your life. Along with book everyone in this world can certainly share their idea. Books can also inspire a lot of people. Plenty of author can inspire their own reader with their story as well as their experience. Not only the storyline that share in the publications. But also they write about the data about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors nowadays always try to improve their proficiency in writing, they also doing some investigation before they write to the book. One of them is this Structure and Chemistry of Crystalline Solids.

Martin Hobson:

Reading a book being new life style in this yr; every people loves to study a book. When you examine a book you can get a lots of benefit. When you read publications, you can improve your knowledge, because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you would like get information about your examine, you can read education books, but if you act like you want to entertain yourself read a fiction books, this sort of us novel, comics, and soon. The Structure and Chemistry of Crystalline Solids provide you with new experience in studying a book.

Stephen Mosley:

What is your hobby? Have you heard that question when you got college students? We believe that that problem was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you know that little person similar to reading or as looking at become their hobby. You need to understand that reading is very important in addition to book as to be the factor. Book is important thing to increase you knowledge, except your teacher or lecturer. You find good news or update concerning something by book. A substantial number of sorts of books that can you decide to try be your object. One of them is actually Structure and Chemistry of Crystalline Solids.
