The Eastern San Juan Mountains: Their Ecology, Geology, and Human History

The Eastern San Juan Mountains: Their Ecology, Geology, and Human History

A companion to *The Western San Juan Mountains* (originally published in 1996), *The Eastern San Juan Mountains* details the physical environment, biological communities, human history, and points of interest in this rich and diverse mountain system.

A natural division between the eastern and western slopes of the San Juans is the north-south line that runs approximately through Lake City, south of the crossing of the Piedra River by US Highway 160. In this super guidebook, twenty-seven contributors--all experts in their fields--artfully bring the geology, hydrology, animal and plant life, human histories, and travel routes of these eastern slopes to life. Designed to inform researchers, educators, and students about the region's complex systems, *The Eastern San Juan Mountains* also serves as an informative guidebook to accompany visitors along their travels on the Silver Thread National Scenic Byway, which stretches between South Fork and Lake City.

The Eastern San Juan Mountains deserves a place next to *The Western San Juan Mountains* on the bookshelf of every naturalist, researcher, resident, educator, student, and tourist seeking a greater understanding of this marvelous place and its history.
