Insulins in Diabetes - ECAB

Insulins in Diabetes - ECAB

Decision making in instituting insulin therapy is an important aspect of diabetes management. The appropriate insulin regimen for an individual patient should take into account the patient's lifestyle, age, motivation, general health, self-management skills, and treatment goals. In addition, a discussion of the newer insulins versus older insulin is a much desired topic in the Indian context. Another area of interest is the insulin delivery mechanism in the intensive care units in hospital settings. This CME module is designed to address such questions with supportive typical clinical scenarios, with which all readers will be able to identify. Thus it provides an excellent opportunity to widen one's perspective in this area.
