INCH KEITH I had desired to visit the Hebrides, or Western Islands of Scotland, so long, that I scarcely remember how the wish was originally excited; and was in the Autumn of the year 1773 induced to undertake the journey, by finding in Mr. Boswell a companion, whose acuteness would help my inquiry, and whose gaiety of conversation and civility of manners are sufficient to counteract the inconveniences of travel, in countries less hospitable than we have passed. On the eighteenth of August we left Edinburgh, a city too well known to admit description, and directed our course northward, along the eastern coast of Scotland, accompanied the first day by another gentleman, who could stay with us only long enough to shew us how much we lost at separation. As we crossed the Frith of Forth, our curiosity was attracted by Inch Keith, a small island, which neither of my companions had ever visited, though, lying within their view, it had all their lives solicited their notice. Here, by climbing with some difficulty over shattered crags, we made the first experiment of unfrequented coasts. Inch Keith is nothing more than a rock covered with a thin layer of earth, not wholly bare of grass, and very fertile of thistles. A small herd of cows grazes annually upon it in the summer. It seems never to have afforded to man or beast a permanent habitation. We found only the ruins of a small fort, not so injured by time but that it might be easily restored to its former state. It seems never to have been intended as a place of strength, nor was built to endure a siege, but merely to afford cover to a few soldiers, who perhaps had the charge of a battery, or were stationed to give signals of approaching danger. There is therefore no provision of water within the walls, though the spring is so near, that it might have been easily enclosed. One of the stones had this inscription: 'Maria Reg. 1564.' It has probably been neglected from the time that the whole island had the same king
