Educational Research: A Guide To the Process

Norman E. Wallen, Jack R. Fraenkel

Educational Research: A Guide To the Process Norman E. Wallen, Jack R. Fraenkel

Educational Research: A Guide to the Process is a different kind of research text. It emphasizes the *process* of research, that is, what researchers actually do as they go about designing and carrying out their research activities. Rather than passively reading about research operations, it promotes content mastery by using a three-step pedagogical model that involves: a manageable chunk of text, a comprehension or application exercise, and author feedback on the exercise. The text contains approximately 150 of these exercise-feedback units.

The second edition has been thoroughly updated, expanded from 15 to 20 chapters, and reorganized into two parts. Part I covers basic aspects of the research process, provides an example of a student research proposal, and shows how to evaluate a research report. Part II provides a separate chapter for each research methodology, including two chapters on qualitative research. Other noteworthy changes include more annotated studies and more visual illustrations of statistical and research methods.
