# Biochemistry of Taste and Olfaction (A monograph series / the Nutrition Foundation)

## **Biochemistry of Taste and Olfaction (A monograph series / the Nutrition Foundation)**

Biochemistry of Taste and Olfaction examines the biochemical aspects of taste and olfaction and their relevance to nutrition, medicine, and food science. More specifically, it considers the biological processes that influence dietary habits, nutritional status, and enjoyment of food, as well as other important social and biological phenomena. It also describes biochemical mechanisms at the peripheral receptor level in taste and olfaction, with emphasis on the role of the cell surface, along with neurotransmitters and other neurochemical aspects of the olfactory system.

Organized into five sections comprised of 24 chapters, this book begins with an overview of biochemical approaches used in studying the phenomena of taste and olfaction. It then proceeds with a discussion of olfactory receptor mechanisms, the accessibility of odorant molecules to the receptors, the role of cilia in olfactory recognition, and the involvement of receptor proteins in vertebrate olfaction. Middle chapters focus on the chemosensation, major histocompatibility complex and olfactory receptors, taste receptor mechanisms, biochemistry of sugar reception in insects, intensity/time phenomena in sugar sweetness, and recognition of taste stimuli at the initial binding interaction. The reader is also introduced to the physicochemical principles of taste and olfaction, molecular mechanisms of transduction in chemoreception, biochemical mechanisms in vertebrate primary olfactory neurons, neurotransmitter biochemistry of the mammalian olfactory bulb, and chemical sensing by bacteria. Examples of chemical sensory systems are included.

This book will be of interest to biochemists, physiologists, neurobiologists, neuroscientists, molecular biologists, food scientists, students, and specialists in psychology, neurophysiology, organic chemistry, and nutrition.

### **From reader reviews:**

#### **Jim Martin:**

As people who live in the modest era should be change about what going on or information even knowledge to make these individuals keep up with the era which can be always change and move forward. Some of you maybe can update themselves by looking at books. It is a good choice in your case but the problems coming to you actually is you don't know what kind you should start with. This Biochemistry of Taste and Olfaction (A monograph series / the Nutrition Foundation) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

#### **Thomas West:**

Do you have something that you want such as book? The book lovers usually prefer to choose book like comic, brief story and the biggest an example may be novel. Now, why not trying Biochemistry of Taste and Olfaction (A monograph series / the Nutrition Foundation) that give your enjoyment preference will be satisfied simply by reading this book. Reading addiction all over the world can be said as the method for people to know world far better then how they react toward the world. It can't be stated constantly that reading routine only for the geeky particular person but for all of you who wants to become success person. So , for all of you who want to start looking at as your good habit, you could pick Biochemistry of Taste and Olfaction (A monograph series / the Nutrition Foundation) become your current starter.

#### **Jerry Thomas:**

In this time globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You can observe that now, a lot of publisher this print many kinds of book. The actual book that recommended to your account is Biochemistry of Taste and Olfaction (A monograph series / the Nutrition Foundation) this publication consist a lot of the information in the condition of this world now. This kind of book was represented how can the world has grown up. The words styles that writer make usage of to explain it is easy to understand. The particular writer made some analysis when he makes this book. Here is why this book acceptable all of you.

#### **Ashley Robinette:**

This Biochemistry of Taste and Olfaction (A monograph series / the Nutrition Foundation) is brand-new way for you who has interest to look for some information since it relief your hunger associated with. Getting deeper you on it getting knowledge more you know otherwise you who still having small amount of digest in reading this Biochemistry of Taste and Olfaction (A monograph series / the Nutrition Foundation) can be the light food to suit your needs because the information inside this specific book is easy to get by means of anyone. These books build itself in the form that is certainly reachable by anyone, that's why I mean in the e-

book application form. People who think that in publication form make them feel tired even dizzy this e-book is the answer. So there isn't any in reading a book especially this one. You can find actually looking for. It should be here for you actually. So , don't miss this! Just read this e-book variety for your better life and knowledge.
