Modern Geography: An Encyclopaedic Survey (Routledge Revivals)

This book charts the developments in the discipline of geography from the 1950s to the 1980s, examining how geography now connects with urban, regional and national planning, and impacts on areas such as medicine, transport, agricultural development and electoral reform. The book also discusses how technical and theoretical advancements have generated a renewed sense of philosophic reflection – a concern closely linked with the critical examination and development of social theory.
