**Distributed Detection and Data Fusion (Signal Processing & Digital Filtering)** Pramod K. Varshney

This book provides an introductory treatment of the fundamentals of decision-making in a distributed framework. Classical detection theory assumes that complete observations are available at a central processor for decision-making. More recently, many applications have been identified in which observations are processed in a distributed manner and decisions are made at the distributed processors, or processed data (compressed observations) are conveyed to a fusion center that makes the global decision. Conventional detection theory has been extended so that it can deal with such distributed detection problems. A unified treatment of recent advances in this new branch of statistical decision theory is presented. Distributed detection under different formulations and for a variety of detection network topologies is discussed. This material is not available in any other book and has appeared relatively recently in technical journals. The level of presentation is such that the book can be used as a graduate-level textbook. Numerous examples are presented throughout the book. It is assumed that the reader has been exposed to detection theory. The book will also serve as a useful reference for practicing engineers and researchers. I have actively pursued research on distributed detection and data fusion over the last decade, which ultimately interested me in writing this book. Many individuals have played a key role in the completion of this book.

### **From reader reviews:**

#### **John Jones:**

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite reserve and reading a guide. Beside you can solve your problem; you can add your knowledge by the guide entitled Distributed Detection and Data Fusion (Signal Processing & Digital Filtering). Try to make the book Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) as your buddy. It means that it can for being your friend when you feel alone and beside those of course make you smarter than previously. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know every little thing by the book. So , let me make new experience as well as knowledge with this book.

#### **Edna Dixon:**

Within other case, little individuals like to read book Distributed Detection and Data Fusion (Signal Processing & Digital Filtering). You can choose the best book if you want reading a book. Providing we know about how is important any book Distributed Detection and Data Fusion (Signal Processing & Digital Filtering). You can add understanding and of course you can around the world with a book. Absolutely right, simply because from book you can know everything! From your country until foreign or abroad you will end up known. About simple issue until wonderful thing you are able to know that. In this era, we can open a book or even searching by internet system. It is called e-book. You can utilize it when you feel bored to go to the library. Let's examine.

#### **Robert Denney:**

Information is provisions for those to get better life, information currently can get by anyone in everywhere. The information can be a understanding or any news even restricted. What people must be consider any time those information which is from the former life are difficult to be find than now could be taking seriously which one is suitable to believe or which one the resource are convinced. If you receive the unstable resource then you have it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) as your daily resource information.

#### **Russell Howell:**

The guide untitled Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) is the reserve that recommended to you to see. You can see the quality of the reserve content that will be shown to you actually. The language that writer use to explained their way of doing something is easily to understand. The writer was did a lot of study when write the book, and so the information that they share for you is absolutely accurate. You also might get the e-book of Distributed Detection and Data Fusion (Signal Processing & Digital Filtering) from the publisher to make you much more enjoy free time.
