This volume, fourth in a series of periodic histories of the institution, is as much a history of the world economy during 1979-89 as one of the IMF itself. Boughton discusses the IMF's surveillance of the international monetary system in the 1980s; the Fund's role in the international debt crisis of the 1980s, and IMF lending in support of structural adjustment in low-income countries during that period. The volume concludes with a general history of the institution, including the quota system, the SDR, membership, and other institutional matters.
