Video coding standards: AVS China, H.264/MPEG-4 PART 10, HEVC, VP6, DIRAC and VC-1 (Signals and Communication Technology)

K.R. Rao, Do Nyeon Kim, Jae Jeong Hwang

Video coding standards: AVS China, H.264/MPEG-4 PART 10, HEVC, VP6, DIRAC and VC-1 (Signals and Communication Technology) K.R. Rao, Do Nyeon Kim, Jae Jeong Hwang

The requirements for multimedia (especially video and audio) communications increase rapidly in the last two decades in broad areas such as television, entertainment, interactive services, telecommunications, conference, medicine, security, business, traffic, defense and banking. Video and audio coding standards play most important roles in multimedia communications. In order to meet these requirements, series of video and audio coding standards have been developed such as MPEG-2, MPEG-4, MPEG-21 for audio and video by ISO/IEC, H.26x for video and G.72x for audio by ITU-T, Video Coder 1 (VC-1) for video by the Society of Motion Picture and Television Engineers (SMPTE) and RealVideo (RV) 9 for video by Real Networks.

AVS China is the abbreviation for Audio Video Coding Standard of China. This new standard includes four main technical areas, which are systems, video, audio and digital copyright management (DRM), and some supporting documents such as consistency verification. The second part of the standard known as AVS1-P2 (Video - Jizhun) was approved as the national standard of China in 2006, and several final drafts of the standard have been completed, including AVS1-P1 (System - Broadcast), AVS1-P2 (Video - Zengqiang), AVS1-P3 (Audio - Double track), AVS1-P3 (Audio - 5.1), AVS1-P7 (Mobile Video), AVS-S-P2 (Video) and AVS-S-P3 (Audio). AVS China provides a technical solution for many applications such as digital broadcasting (SDTV and HDTV), high-density storage media, Internet streaming media, and will be used in the domestic IPTV, satellite and possibly the cable TV market. Comparing with other coding standards such as H.264 AVC, the advantages of AVS video standard include similar performance, lower complexity, lower implementation cost and licensing fees. This standard has attracted great deal of attention from industries related to television, multimedia communications and even chip manufacturing from around the world. Also many well known companies have joined the AVS Group to be Full Members or Observing Members. The 163 members of AVS Group include Texas Instruments (TI) Co., Agilent Technologies Co. Ltd., Envivio Inc., NDS, Philips Research East Asia, Aisino Corporation, LG, Alcatel Shanghai Bell Co. Ltd., Nokia (China) Investment (NCIC) Co. Ltd., Sony (China) Ltd., and Toshiba (China) Co. Ltd. as well as some high level universities in China. Thus there is a pressing need from the instructors, students, and engineers for a book dealing with the topic of AVS China and its performance comparisons with similar standards such as H.264, VC-1 and RV-9.

From reader reviews:

Dorothy Tran:

People live in this new morning of lifestyle always attempt to and must have the free time or they will get large amount of stress from both way of life and work. So , if we ask do people have free time, we will say absolutely sure. People is human not a robot. Then we question again, what kind of activity do you have when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you ever try this one, reading guides. It can be your alternative in spending your spare time, typically the book you have read is definitely Video coding standards: AVS China, H.264/MPEG-4 PART 10, HEVC, VP6, DIRAC and VC-1 (Signals and Communication Technology).

Daniel Padilla:

Your reading 6th sense will not betray you, why because this Video coding standards: AVS China, H.264/MPEG-4 PART 10, HEVC, VP6, DIRAC and VC-1 (Signals and Communication Technology) guide written by well-known writer who knows well how to make book that could be understand by anyone who have read the book. Written within good manner for you, leaking every ideas and composing skill only for eliminate your current hunger then you still doubt Video coding standards: AVS China, H.264/MPEG-4 PART 10, HEVC, VP6, DIRAC and VC-1 (Signals and Communication Technology) as good book not simply by the cover but also from the content. This is one guide that can break don't determine book by its cover, so do you still needing yet another sixth sense to pick this!?! Oh come on your reading through sixth sense already alerted you so why you have to listening to an additional sixth sense.

Derick Heinz:

Don't be worry in case you are afraid that this book can filled the space in your house, you might have it in e-book way, more simple and reachable. This Video coding standards: AVS China, H.264/MPEG-4 PART 10, HEVC, VP6, DIRAC and VC-1 (Signals and Communication Technology) can give you a lot of pals because by you checking out this one book you have thing that they don't and make a person more like an interesting person. This particular book can be one of one step for you to get success. This book offer you information that possibly your friend doesn't learn, by knowing more than various other make you to be great men and women. So , why hesitate? We need to have Video coding standards: AVS China, H.264/MPEG-4 PART 10, HEVC, VP6, DIRAC and VC-1 (Signals and Communication Technology).

Richard Lawrence:

That guide can make you to feel relax. That book Video coding standards: AVS China, H.264/MPEG-4 PART 10, HEVC, VP6, DIRAC and VC-1 (Signals and Communication Technology) was colourful and of course has pictures on there. As we know that book Video coding standards: AVS China, H.264/MPEG-4 PART 10, HEVC, VP6, DIRAC and VC-1 (Signals and Communication Technology) has many kinds or

style. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. Therefore , not at all of book are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading this.
