Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) D. J. Benson

This is the second of two volumes which will provide an introduction to modern developments in the representation theory of finite groups and associative algebras. The subject is viewed from the perspective of homological algebra and the theory of representations of finite dimensional algebras; the author emphasises modular representations and the homological algebra associated with their categories. This volume concentrates on the cohomology of groups, always with representations in view, however. It begins with a background reference chapter, then proceeds to an overview of the algebraic topology and K-theory associated with cohomology of groups, especially the work of Quillen. Later chapters look at algebraic and topological proofs of the finite generation of the cohomology ring of a finite group, and an algebraic approach to the Steenrod operations in group cohomology. The book cumulates in a chapter dealing with the theory of varieties for modules. Much of the material presented here has never appeared before in book form. Consequently students and research workers studying group theory, and indeed algebra in general, will be grateful to Dr Benson for supplying an exposition of a good deal of the essential results of modern representation theory.

From reader reviews:

Alfred Greenwell:

This Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) is brand-new way for you who has intense curiosity to look for some information mainly because it relief your hunger info. Getting deeper you into it getting knowledge more you know or you who still having small amount of digest in reading this Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) can be the light food to suit your needs because the information inside this kind of book is easy to get through anyone. These books acquire itself in the form which is reachable by anyone, that's why I mean in the e-book web form. People who think that in guide form make them feel sleepy even dizzy this publication is the answer. So there is absolutely no in reading a publication especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss that! Just read this e-book sort for your better life in addition to knowledge.

Paul Williams:

That guide can make you to feel relax. This kind of book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) was vibrant and of course has pictures on there. As we know that book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) has many kinds or genre. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and believe you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading which.

Donald Spada:

Publication is one of source of information. We can add our expertise from it. Not only for students but additionally native or citizen need book to know the update information of year to be able to year. As we know those ebooks have many advantages. Beside all of us add our knowledge, can bring us to around the world. With the book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) we can take more advantage. Don't you to be creative people? Being creative person must choose to read a book. Only choose the best book that ideal with your aim. Don't be doubt to change your life at this book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics). You can more pleasing than now.

Nicole Powell:

Reading a book make you to get more knowledge from it. You can take knowledge and information from the book. Book is created or printed or descriptive from each source this filled update of news. In this particular modern era like now, many ways to get information are available for anyone. From media social just like

newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just trying to find the Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) when you required it?
