**Dyslexia, Learning, and the Brain (MIT Press)** Roderick Nicolson, Angela Fawcett

Dyslexia research has made dramatic progress since the mid-1980s. Once discounted as a "middle-class myth," dyslexia is now the subject of a complex -- and confusing -- body of theoretical and empirical research. In *Dyslexia, Learning, and the Brain*, leading dyslexia researchers Roderick Nicolson and Angela Fawcett provide a uniquely broad and coherent analysis of dyslexia theory. Unlike most dyslexia research, which addresses the question "what is the cause of the reading disability called dyslexia?" the authors' work has addressed the deeper question of "what is the cause of the learning disability that manifests as reading problems?" This perspective allows them to place dyslexia research within the much broader disciplines of cognitive psychology and cognitive neuroscience and has led to a rich framework, including two established leading theories, the automatization deficit account (1990) and the cerebellar deficit hypothesis (2001). Nicolson and Fawcett show that extensive evidence has accumulated to support these two theories and that they may be seen as subsuming the established phonological deficit account and sensory processing accounts. Moving to the explanatory level of neural systems, they argue that all these disorders reflect problems in some component of the procedural learning system, a multiregion system including major components of cortical and subcortical regions. The authors' answer to the fundamental question "what is dyslexia?" offers a challenge and motivation for research throughout the learning disabilities, laying the foundations for future progress.

**From reader reviews:**

**Donna Miller:**

Why don't make it to become your habit? Right now, try to ready your time to do the important behave, like looking for your favorite guide and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the e-book entitled Dyslexia, Learning, and the Brain (MIT Press). Try to make the book Dyslexia, Learning, and the Brain (MIT Press) as your friend. It means that it can for being your friend when you feel alone and beside those of course make you smarter than before. Yeah, it is very fortunated for yourself. The book makes you a lot more confidence because you can know everything by the book. So , we should make new experience and also knowledge with this book.

**Trevor Wright:**

Information is provisions for those to get better life, information today can get by anyone at everywhere. The information can be a knowledge or any news even a concern. What people must be consider when those information which is from the former life are challenging to be find than now is taking seriously which one is appropriate to believe or which one often the resource are convinced. If you get the unstable resource then you understand it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take Dyslexia, Learning, and the Brain (MIT Press) as your daily resource information.

**Shanon Stephens:**

Reading can called thoughts hangout, why? Because while you are reading a book specially book entitled Dyslexia, Learning, and the Brain (MIT Press) your brain will drift away trough every dimension, wandering in each aspect that maybe not known for but surely will become your mind friends. Imaging each and every word written in a publication then become one form conclusion and explanation that will maybe you never get just before. The Dyslexia, Learning, and the Brain (MIT Press) giving you one more experience more than blown away the mind but also giving you useful details for your better life in this era. So now let us present to you the relaxing pattern the following is your body and mind will be pleased when you are finished reading it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

**James Robinson:**

As a scholar exactly feel bored to reading. If their teacher questioned them to go to the library or even make summary for some book, they are complained. Just very little students that has reading's soul or real their passion. They just do what the educator want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Dyslexia, Learning, and the Brain (MIT Press) can make you truly feel

more interested to read.
