## **Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe** J. Craig Wheeler

From supernovae and gamma-ray bursts to the accelerating Universe, this is an exploration of the intellectual threads that lead to some of the most exciting ideas in modern astrophysics and cosmology. This fully updated second edition incorporates new material on binary stars, black holes, gamma-ray bursts, worm-holes, quantum gravity and string theory. It covers the origins of stars and their evolution, the mechanisms responsible for supernovae, and their progeny, neutron stars and black holes. It examines the theoretical ideas behind black holes and their manifestation in observational astronomy and presents neutron stars in all their variety known today. This book also covers the physics of the twentieth century, discussing quantum theory and Einstein's gravity, how these two theories collide, and the prospects for their reconciliation in the twenty-first century. This will be essential reading for undergraduate students in astronomy and astrophysics, and an excellent, accessible introduction for a wider audience.

### **From reader reviews:**

#### **Catherine Poppe:**

This book untitled Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe to be one of several books that best seller in this year, this is because when you read this book you can get a lot of benefit on it. You will easily to buy this book in the book shop or you can order it by means of online. The publisher in this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Mobile phone. So there is no reason for your requirements to past this reserve from your list.

#### **Claudia Weidner:**

Reading a book can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new details. When you read a reserve you will get new information mainly because book is one of various ways to share the information as well as their idea. Second, studying a book will make a person more imaginative. When you reading a book especially fictional works book the author will bring that you imagine the story how the figures do it anything. Third, you are able to share your knowledge to others. When you read this Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe, you are able to tells your family, friends as well as soon about yours reserve. Your knowledge can inspire average, make them reading a book.

#### **Shawn Proctor:**

Beside that Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe in your phone, it may give you a way to get nearer to the new knowledge or info. The information and the knowledge you are going to got here is fresh from your oven so don't end up being worry if you feel like an old people live in narrow small town. It is good thing to have Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe because this book offers to you readable information. Do you occasionally have book but you rarely get what it's about. Oh come on, that will not end up to happen if you have this with your hand. The Enjoyable blend here cannot be questionable, just like treasuring beautiful island. Techniques you still want to miss this? Find this book in addition to read it from at this point!

#### **William Johnson:**

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you may have it in e-book means, more simple and reachable. That Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe can give you a lot of close friends because by you investigating this one book you have thing that they don't and make anyone more like an interesting person. This book can be one of a step for you to get success. This publication offer you information that possibly your friend doesn't understand, by knowing more than additional make you to be great people. So , why hesitate? Let me have Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe.
