## Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research)

The present challenge in the treatment of tumors is to reduce the number of patients that still die as a result of primary tumors. Today, the percentage of such deaths remains high at 30%, even when all the common therapeutic methods, namely surgery, radiotherapy, and chemotherapy, are applied. In order to reduce this percentage, new types of radiation sources with a higher linear energy transfer have been introduced, such as neutrons and pions. Fractionation patterns have been modified and radiosensitizers have been applied to increase biological efficiency. Studies of the combined application of chemotherapy and radiotherapy have been made to find the best therapeutic effect. In the early 1970s biological findings confirmed the effect of hyperthermia on tumor cells. The first clinical studies on hyperthermia treatment demonstrated that it resulted in better local tumor control. Further application of this treatment modality showed that hyperthermia should be used in addition to radiotherapy and chemotherapy. Despite these encouraging results, hyperthermia has not been introduced into common clinical use, due primarily to technical problems. There are a number of methods of transferring heat into tumors; however, with regard to physical conditions, an optimum method has not yet been found. One of the reasons is that up to now we have had no reliable method of obtaining thermal mapping of all parts of the human body. Such measurements are required not only for dosimetric purposes but also for the regulation of a hyperthermic system.

### **From reader reviews:**

#### **Johanna Garrett:**

Reading a book can be one of a lot of action that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people like it. First reading a book will give you a lot of new facts. When you read a book you will get new information because book is one of several ways to share the information or their idea. Second, reading through a book will make anyone more imaginative. When you examining a book especially fictional book the author will bring one to imagine the story how the personas do it anything. Third, you could share your knowledge to other folks. When you read this Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research), it is possible to tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire different ones, make them reading a reserve.

#### **Gussie Steller:**

The reserve with title Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) possesses a lot of information that you can understand it. You can get a lot of profit after read this book. This book exist new understanding the information that exist in this reserve represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you throughout new era of the internationalization. You can read the e-book with your smart phone, so you can read this anywhere you want.

#### **Mary Craine:**

Do you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Attempt to pick one book that you find out the inside because don't ascertain book by its cover may doesn't work at this point is difficult job because you are scared that the inside maybe not since fantastic as in the outside look likes. Maybe you answer can be Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) why because the wonderful cover that make you consider in regards to the content will not disappoint an individual. The inside or content is actually fantastic as the outside or even cover. Your reading sixth sense will directly direct you to pick up this book.

#### **Robert Higby:**

As we know that book is vital thing to add our knowledge for everything. By a publication we can know everything we wish. A book is a set of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This book Locoregional High-Frequency Hyperthermia and Temperature Measurement (Recent Results in Cancer Research) was filled regarding science. Spend your time to add your knowledge about your science competence. Some people has diverse feel when they reading the book. If you know how big benefit of a book, you can sense enjoy to read a book. In the modern era like currently, many ways to get book which you wanted.
