Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) Raymond L. Chambers, David G. Steel, Suojin Wang, Alan Welsh

Sample surveys provide data used by researchers in a large range of disciplines to analyze important relationships using well-established and widely used likelihood methods. The methods used to select samples often result in the sample differing in important ways from the target population and standard application of likelihood methods can lead to biased and inefficient estimates.

Maximum Likelihood Estimation for Sample Surveys presents an overview of likelihood methods for the analysis of sample survey data that account for the selection methods used, and includes all necessary background material on likelihood inference. It covers a range of data types, including multilevel data, and is illustrated by many worked examples using tractable and widely used models. It also discusses more advanced topics, such as combining data, non-response, and informative sampling.

The book presents and develops a likelihood approach for fitting models to sample survey data. It explores and explains how the approach works in tractable though widely used models for which we can make considerable analytic progress. For less tractable models numerical methods are ultimately needed to compute the score and information functions and to compute the maximum likelihood estimates of the model parameters. For these models, the book shows what has to be done conceptually to develop analyses to the point that numerical methods can be applied.

Designed for statisticians who are interested in the general theory of statistics, **Maximum Likelihood Estimation for Sample Surveys** is also aimed at statisticians focused on fitting models to sample survey data, as well as researchers who study relationships among variables and whose sources of data include surveys.

From reader reviews:

Nancy Smith:

Book is definitely written, printed, or illustrated for everything. You can recognize everything you want by a publication. Book has a different type. As we know that book is important point to bring us around the world. Close to that you can your reading proficiency was fluently. A publication Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) will make you to end up being smarter. You can feel more confidence if you can know about almost everything. But some of you think that open or reading some sort of book make you bored. It isn't make you fun. Why they may be thought like that? Have you in search of best book or appropriate book with you?

Jacqueline Stalling:

This Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) book is simply not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is usually information inside this e-book incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. That Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) without we understand teach the one who looking at it become critical in imagining and analyzing. Don't become worry Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) can bring any time you are and not make your handbag space or bookshelves' grow to be full because you can have it in the lovely laptop even cellphone. This Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) having excellent arrangement in word and layout, so you will not really feel uninterested in reading.

Justin Oliver:

Do you certainly one of people who can't read gratifying if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) book is readable by means of you who hate the perfect word style. You will find the data here are arrange for enjoyable studying experience without leaving perhaps decrease the knowledge that want to offer to you. The writer regarding Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) content conveys prospect easily to understand by lots of people. The printed and e-book are not different in the content but it just different available as it. So , do you still thinking Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) is not loveable to be your top listing reading book?

Maxine Whitley:

The book entitled Maximum Likelihood Estimation for Sample Surveys (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) contain a lot of information on the item. The writer explains your girlfriend idea with easy method. The language is very clear to see all the people, so do not worry, you can easy to read the idea. The book was written by famous author. The author brings you in the new era of literary works. It is possible to read this book because you can please read on your smart phone, or device, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site in addition to order it. Have a nice study.
