Lévy Statistics and Laser Cooling: How Rare Events Bring Atoms to Rest François Bardou, Jean-Philippe Bouchaud, Alain Aspect, Claude Cohen-Tannoudji

Laser cooling of atoms provides an ideal case study for the application of Lévy statistics in a privileged situation where the statistical model can be derived from first principles. This 2001 book demonstrates how the most efficient laser cooling techniques can be simply and quantitatively understood in terms of non-ergodic random processes dominated by a few rare events. Lévy statistics are now recognised as the proper tool for analysing many different problems for which standard Gaussian statistics are inadequate. Laser cooling provides a simple example of how Lévy statistics can yield analytic predictions that can be compared to other theoretical approaches and experimental results. The authors of this book are world leaders in the fields of laser cooling and light-atom interactions, and are renowned for their clear presentation. This book will therefore hold much interest for graduate students and researchers in the fields of atomic physics, quantum optics, and statistical physics.

From reader reviews:

John Lopez:

Do you have favorite book? Should you have, what is your favorite's book? Guide is very important thing for us to learn everything in the world. Each publication has different aim or goal; it means that guide has different type. Some people really feel enjoy to spend their the perfect time to read a book. These are reading whatever they take because their hobby will be reading a book. Think about the person who don't like looking at a book? Sometime, person feel need book whenever they found difficult problem as well as exercise. Well, probably you should have this Lévy Statistics and Laser Cooling: How Rare Events Bring Atoms to Rest.

Evelyn Roberts:

Now a day individuals who Living in the era everywhere everything reachable by connect to the internet and the resources inside it can be true or not demand people to be aware of each information they get. How individuals to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Examining a book can help persons out of this uncertainty Information particularly this Lévy Statistics and Laser Cooling: How Rare Events Bring Atoms to Rest book as this book offers you rich information and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it you may already know.

Richard Dutton:

This book untitled Lévy Statistics and Laser Cooling: How Rare Events Bring Atoms to Rest to be one of several books that will best seller in this year, that is because when you read this e-book you can get a lot of benefit into it. You will easily to buy that book in the book shop or you can order it by way of online. The publisher in this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Smartphone. So there is no reason for your requirements to past this e-book from your list.

Manuel Rose:

Within this era which is the greater individual or who has ability to do something more are more precious than other. Do you want to become among it? It is just simple approach to have that. What you are related is just spending your time almost no but quite enough to possess a look at some books. One of many books in the top list in your reading list is definitely Lévy Statistics and Laser Cooling: How Rare Events Bring Atoms to Rest. This book that is certainly qualified as The Hungry Mountains can get you closer in turning into precious person. By looking up and review this publication you can get many advantages.
