Advances in microbial food safety: 17. New research on modified-atmosphere packaging and pathogen behaviour (Woodhead Publishing Series in Food Science, Technology and Nutrition)

A. Vermeulen, P. Ragaert, A. Rajkovic, S. Samapundo, F. Lopez-Galvez, F. Devlieghere

Consumers are switching to fresh, minimally processed foods, creating challenges in terms of ensuring food safety. The shift in food production from local to global has led to a complex logistics chain. These trends and challenges have led to the development of packaging materials with better barrier properties, and active and intelligent packaging. A recent trend is the increasing sustainability of food packaging. Modified atmosphere or vacuum packaging gives a longer shelf life by reducing the growth of spoilage microorganisms and/or oxidation processes. This chapter focuses on modified-atmosphere packaging (MAP). The effects of high and low O₂, elevated CO₂ concentrations and equilibrium modified-atmosphere packaging (EMAP) are considered. The influence on food infectants, toxin-producing bacteria and mycotoxins is discussed. Recent studies on MAP have had contradictory results, mostly owing to differences in experimental design and materials.

From reader reviews:

Eva Ammons:

Book is to be different per grade. Book for children till adult are different content. As we know that book is very important usually. The book Advances in microbial food safety: 17. New research on modified-atmosphere packaging and pathogen behaviour (Woodhead Publishing Series in Food Science, Technology and Nutrition) seemed to be making you to know about other knowledge and of course you can take more information. It is extremely advantages for you. The publication Advances in microbial food safety: 17. New research on modified-atmosphere packaging and pathogen behaviour (Woodhead Publishing Series in Food Science, Technology and Nutrition) is not only giving you far more new information but also being your friend when you truly feel bored. You can spend your current spend time to read your publication. Try to make relationship using the book Advances in microbial food safety: 17. New research on modified-atmosphere packaging and pathogen behaviour (Woodhead Publishing Series in Food Science, Technology and Nutrition). You never sense lose out for everything in the event you read some books.

May Chapa:

As people who live in often the modest era should be up-date about what going on or facts even knowledge to make all of them keep up with the era that is certainly always change and make progress. Some of you maybe will certainly update themselves by studying books. It is a good choice in your case but the problems coming to you is you don't know which one you should start with. This Advances in microbial food safety: 17. New research on modified-atmosphere packaging and pathogen behaviour (Woodhead Publishing Series in Food Science, Technology and Nutrition) is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

Denise Zimmerman:

Information is provisions for individuals to get better life, information presently can get by anyone from everywhere. The information can be a know-how or any news even a problem. What people must be consider while those information which is within the former life are challenging be find than now's taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you have the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen in you if you take Advances in microbial food safety: 17. New research on modified-atmosphere packaging and pathogen behaviour (Woodhead Publishing Series in Food Science, Technology and Nutrition) as the daily resource information.

Cheryl Bullen:

What is your hobby? Have you heard in which question when you got scholars? We believe that that

question was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person just like reading or as reading through become their hobby. You need to know that reading is very important along with book as to be the thing. Book is important thing to increase you knowledge, except your teacher or lecturer. You get good news or update in relation to something by book. A substantial number of sorts of books that can you decide to try be your object. One of them is this Advances in microbial food safety: 17. New research on modified-atmosphere packaging and pathogen behaviour (Woodhead Publishing Series in Food Science, Technology and Nutrition).
