Industrialization of Biology: A Roadmap to Accelerate the Advanced Manufacturing of Chemicals

Committee on Industrialization of Biology: A Roadmap to Accelerate the Advanced Manufacturing of Chemicals, Board on Chemical Sciences and Technology, Board on Life Sciences, Division on Earth and Life Studies, National Research Council

The tremendous progress in biology over the last half century - from Watson and Crick's elucidation of the structure of DNA to today's astonishing, rapid progress in the field of synthetic biology - has positioned us for significant innovation in chemical production. New bio-based chemicals, improved public health through improved drugs and diagnostics, and biofuels that reduce our dependency on oil are all results of research and innovation in the biological sciences. In the past decade, we have witnessed major advances made possible by biotechnology in areas such as rapid, low-cost DNA sequencing, metabolic engineering, and high-throughput screening. The manufacturing of chemicals using biological synthesis and engineering could expand even faster. A proactive strategy - implemented through the development of a technical roadmap similar to those that enabled sustained growth in the semiconductor industry and our explorations of space - is needed if we are to realize the widespread benefits of accelerating the industrialization of biology.

Industrialization of Biology presents such a roadmap to achieve key technical milestones for chemical manufacturing through biological routes. This report examines the technical, economic, and societal factors that limit the adoption of bioprocessing in the chemical industry today and which, if surmounted, would markedly accelerate the advanced manufacturing of chemicals via industrial biotechnology. Working at the interface of synthetic chemistry, metabolic engineering, molecular biology, and synthetic biology, *Industrialization of Biology* identifies key technical goals for next-generation chemical manufacturing, then identifies the gaps in knowledge, tools, techniques, and systems required to meet those goals, and targets and timelines for achieving them. This report also considers the skills necessary to accomplish the roadmap goals, and what training opportunities are required to produce the cadre of skilled scientists and engineers needed.

From reader reviews:

Linda Banks:

Reading can called thoughts hangout, why? Because when you find yourself reading a book specifically book entitled Industrialization of Biology: A Roadmap to Accelerate the Advanced Manufacturing of Chemicals your head will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely can become your mind friends. Imaging every single word written in a publication then become one web form conclusion and explanation this maybe you never get just before. The Industrialization of Biology: A Roadmap to Accelerate the Advanced Manufacturing of Chemicals giving you a different experience more than blown away your thoughts but also giving you useful data for your better life with this era. So now let us teach you the relaxing pattern is your body and mind will likely be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

Frances Hayes:

This Industrialization of Biology: A Roadmap to Accelerate the Advanced Manufacturing of Chemicals is great e-book for you because the content which can be full of information for you who all always deal with world and still have to make decision every minute. This particular book reveal it data accurately using great arrange word or we can point out no rambling sentences included. So if you are read it hurriedly you can have whole data in it. Doesn't mean it only provides straight forward sentences but tricky core information with splendid delivering sentences. Having Industrialization of Biology: A Roadmap to Accelerate the Advanced Manufacturing of Chemicals in your hand like keeping the world in your arm, information in it is not ridiculous just one. We can say that no reserve that offer you world throughout ten or fifteen small right but this reserve already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. busy do you still doubt that?

Ella Norman:

Do you like reading a book? Confuse to looking for your favorite book? Or your book seemed to be rare? Why so many question for the book? But almost any people feel that they enjoy regarding reading. Some people likes examining, not only science book and also novel and Industrialization of Biology: A Roadmap to Accelerate the Advanced Manufacturing of Chemicals or perhaps others sources were given understanding for you. After you know how the truly great a book, you feel would like to read more and more. Science e-book was created for teacher as well as students especially. Those guides are helping them to put their knowledge. In other case, beside science reserve, any other book likes Industrialization of Biology: A Roadmap to Accelerate the Advanced Manufacturing of Chemicals to make your spare time far more colorful. Many types of book like this.

Jessica Harris:

Reading a book make you to get more knowledge from that. You can take knowledge and information from the book. Book is written or printed or outlined from each source in which filled update of news. With this modern era like now, many ways to get information are available for you. From media social like newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just in search of the Industrialization of Biology: A Roadmap to Accelerate the Advanced Manufacturing of Chemicals when you required it?
